

The 12th

APEC Forum

on Human Resources Development

"The Role of TVET Providers in Training for Employees"

The upcoming forum will focus on “**The Role of TVET Providers in Training for Employees**” and exchange information on the current understanding of TVET providers, (clarification of quantity and content, supply structure and demand structure), role-sharing among TVET providers (division of roles between the national government, public interest corporations, and private sector entities), promoting use of TVET providers, etc.

It is increasingly important to deploy the role of TVET that enables each and every individual worker to receive the correct education and training in actual business so as to improve their vocational capabilities. We will welcome your participation and look forward to your presence at the forum.
