

## **CHAPTER III**

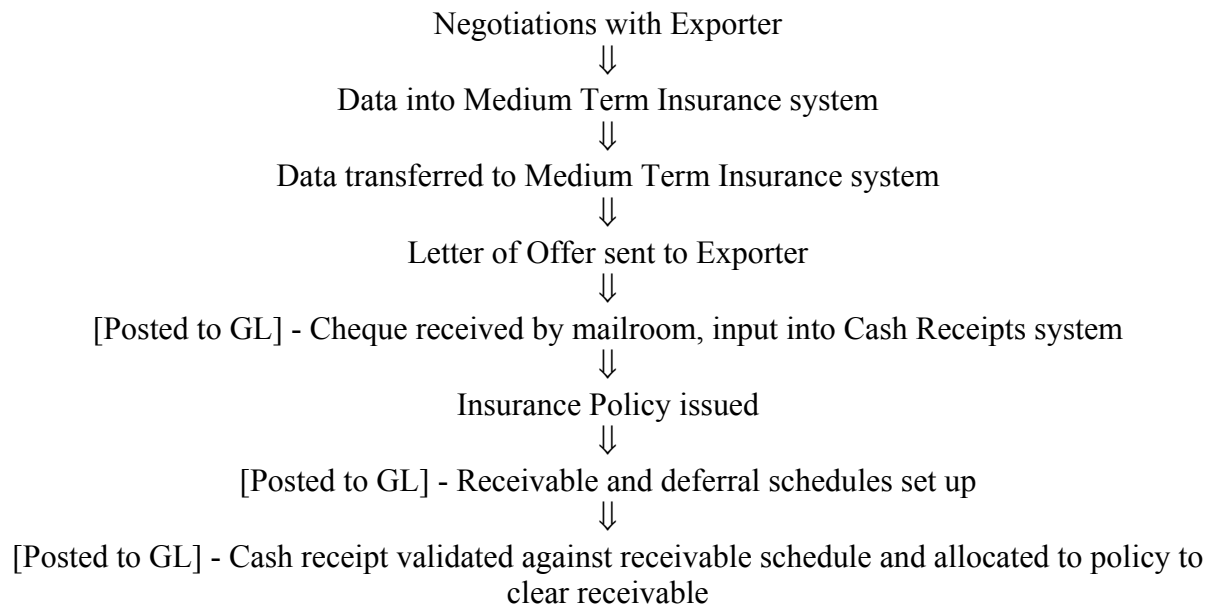

### **Management of Medium Term Insurance**

#### **Medium Term Insurance**

##### **Interface With Other Systems**

- Medium Term Insurance Pipeline system
- Cash Receipts system
- Claims and Recoveries system
- General Ledger system
- Corporate Tables

#### **Medium Term Insurance**

#### **Premiums**

For medium term policies, premiums are taken into income using methods which reflect the exposures over the terms of the policies

## Expenses

### Direct Expenses

- Generally direct expenses should be expensed in the same period as the related revenue.
- Up front expenses such as broker fees and commissions which do not cover ongoing services and are not recoverable are expensed as incurred.

### Indirect Expenses

- Indirect expenses are which cannot be directly allocated to a specific policy (eg general office expenses and salaries)
- Indirect expenses are expensed as incurred.

## Medium Term Policy Example

### Example 1

EDC issues a Specific Transaction insurance policy with a five year term to insure the export of Canadian goods to Venezuela. Total insured volume is \$1 million and total premium is \$60,000. The business is done through a broker and the broker fee is \$6,000. The expected average loss rate is 50% of net premium income.

*(In this case the broker **dose not provide ongoing service** and the broker fee expense is **not recoverable**. Expense, therefore, is expensed at commencement of coverage)*

### Policy Details

|                       |                          |              |                      |

| Claims Expiry Date:   | <u>April 30, 2002</u>    |              |                      |

## Premium Accounting Entries

### GL entries created upon issuance of policy

#### 1) Set up of premium receivable

|                     |        |        |
|---------------------|--------|--------|
| Premiums receivable | 60,000 |        |
| Deferred Premiums   |        | 60,000 |

#### 2) Set up of broker fee payable and expense broker fee

|                    |       |       |
|--------------------|-------|-------|
| Broker fee expense | 6,000 |       |
| Broker fee payable |       | 6,000 |

#### 3) Receipt of premium

|                           |        |        |
|---------------------------|--------|--------|
| Bank                      | 60,000 |        |
| Medium term bank suspense |        | 60,000 |

#### 4) Allocation of cash receipt

|                           |        |        |
|---------------------------|--------|--------|
| Medium term bank suspense | 60,000 |        |
| Premiums receivable       |        | 60,000 |

#### 5) Cash disbursement

|                    |       |       |
|--------------------|-------|-------|
| Broker fee payable | 6,000 |       |
| Bank               |       | 6,000 |

#### 6) Monthly recognition of premium income

|   |                    |       |
|---|--------------------|-------|
| Deferred Premiums                       | 1,000 <sup>1</sup> |       |
| Premium income                          |                    | 1,000 |
| (recognition of monthly premium income) |                    |       |

1.  $60,000/5\text{yrs} = 12,000/12 = \underline{1,000}$

#### 7) Monthly recognition of provision expense at 50%

|                      |     |     |
|----------------------|-----|-----|
| Provision expense    | 500 |     |
| Allowance for claims |     | 500 |

(1,000 \* .50 = 500)

## Accounting Reconciliation at End of Policy Term

|                      |                         |                        |
|----------------------|-------------------------|------------------------|
| Bank                 | Medium Term<br>Suspense | Premiums<br>Receivable |
| 60,000(3)            | 60,000(3)               | 60,000(1)              |
| 6,000(5)             | 60,000(4)               | 60,000(4)              |
|                      |                         |                        |
| Deferred<br>Premiums | Premium<br>Income       | Provision Expense      |
| 60,000(6)            | 60,000(6)               | 30,000(7)              |
| 60,000(1)            |                         |                        |
|                      |                         |                        |
| Allowance for Claims | Broker Fee<br>Payable   | Broker Fee<br>Expense  |
| 30,000(7)            | 6,000(2)                | 6,000(2)               |
|                      | 6,000(5)                |                        |

## Financial Statement Presentation

### BALANCE SHEET

#### ASSETS

|                     |                        |
|---------------------|------------------------|
| Cash                | \$54,000               |

| <b>NET INCOME</b>            | <b><u>\$24,000</u></b> |

## Medium Term Insurance

| Fee Summary             |                  |                |
|-------------------------|------------------|----------------|
| Policy No: STI-01-00001 |                  |                |
| Currency: Cdn           |                  |                |
| Installment Type        | Total Receivable | Total Received |
| Risk Premium            | 60,000           | 60,000         |

| Cash Receipts |              |      |                |           |                 |     |
|---------------|--------------|------|----------------|-----------|-----------------|-----|
| Document#     | Receipt Date | Curr | Receipt Amount | System ID | Unallocated AMT | APP |
| DDB5820       | Feb 11,1997  | Cdn  | 60,000         | MTI       | 0               | X   |

## Medium Term Policy Example

### Example 2

EDC issues a Specific Transaction insurance policy with a five year term to insure the export of Canadian goods to Venezuela. Total insured volume is \$1 million and total premium is \$60,000. The business is done through a broker and the broker fee is \$6,000. The expected average loss rate is 50% of net premium income.

*(In this case broker **provides ongoing service** and the broker fee expense is **recoverable**. Broker fee is, therefore expensed in the same period as the related premium revenue.)*

## Premium Accounting Entries

**All journal entries are the same as required for Example 1 except for the following entries:**

### **2) Set up of broker fee payable and deferral**

|                    |       |       |
|--------------------|-------|-------|
| Deferred premiums  | 6,000 |       |
| Broker fee payable |       | 6,000 |

### **Monthly recognition of broker fee expense**

|                    |                  |     |
|--------------------|------------------|-----|
| Broker fee expense | 100 <sup>1</sup> |     |
| Deferred premium   |                  | 100 |

1.  $6,000/5\text{yrs} = 1,200/12 = \underline{100}$

## **Medium Term Insurance**

### **Endorsements**

- An endorsement is a change in an existing policy which may result in either an additional premium, a return premium, or no premium adjustment. Endorsements may be made at any time during the policy term.
- The accounting for endorsement premiums is the same as accounting for original premiums.
- Examples of endorsements include extending or reducing period of cover, increasing or decreasing insured amounts.
- An endorsement cannot adjust a prior period after the period has been balanced and closed.

### **Monthly Reconciliations**

#### **The Accounting Administrator:**

- Reconciles receivable, deferral and revenue balances in the Medium Term Insurance System to ending balances in the General Ledger
- Reconciles unallocated cash receipts in Cash Receipts system to medium term suspense account balance in General Ledger
- Notifies underwriters of all policies with receivable balances

## Case Studies

### Premiums

#### Example 1

On October 1, a short - term policy is issued to cover insured volumes of \$ 1,000,000 in Algeria. The processing fee is \$200.

#### **Required:**

Record the journal entries required to account for the following events:

- 1) On October 1, the processing fee of \$200 is received.
  
- 2) On November 10 1997, a declaration is received from the exporter with a premium cheque in the amount of \$10,000. The expected loss rate is 50% of premium income.

#### Answer to Example 1

|   |        |        |
|---|--------|--------|
| 1) Bank   | 200    |        |
| Short term bank suspense<br>(receipt of processing fee)                             |        | 200    |
| short term bank suspense  | 200    |        |
| processing fees<br>(processing fee applied to policy)                               |        | 200    |
|   |        |        |
| 2) Accounts receivable  | 10,000 |        |
| premium income<br>(set up of accounts receivable and recognition of premium income) |        | 10,000 |

|  |        |        |
|--|--------|--------|
| Provision expense                        |        |        |
| Allowance for claims                     |        | 5,000  |
| (recognition of provision expense )      |        |        |
| Bank                                     | 10,000 |        |
| Short term bank suspense                 |        | 10,000 |
| (receipt of premium)                     |        |        |
| Short term bank suspense                 | 10,000 |        |
| Accounts receivable                      |        | 10,000 |
| (allocation of premium to proper policy) |        |        |

### Example 2

A medium term insurance policy with a premium amount of \$ 120,00 is issued to cover insured volumes of \$ 2,000,000. The period of cover s from January 1, 1997 to December 31, 2001 and the Claims Expiry date is December 31, 2002. The export's co-insurance ration is 10%. The expected loss rate is 50% of premium income. There is no broker involved.

A) Record the journal entries required to account for the following events:

- 1) The policy is issued on January 1, 1997. Record the set up of the receivable and deferred accounts
- 2) The premium amount of \$120,000 is received on January 10, 1997. Record the allocation of the cash receipt.
- 3) Record the premium income and provision expense account entries for the month of January

B) What is the balance remaining in the Deferred Premium account on December 31, 1997?

C) What is the Contingent Liability for this policy?

D) When does the Contingent Liability expire?

**Answer to Example 2.**

A)

|                                |         |         |
|--------------------------------|---------|---------|
| 1) Premium receivable          | 120,000 |         |
| Deferred premium               |         | 120,000 |
| (to record premium receivable) |         |         |

|                                |         |         |
|--------------------------------|---------|---------|
| 2) Bank                        | 120,000 |         |
| Medium term bank suspense      |         | 120,000 |
| (to record receipt of premium) |         |         |

|                           |         |         |
|---------------------------|---------|---------|
| Medium term bank suspense | 120,000 |         |
| Premium receivable        |         | 120,000 |
| (to allocate receipt)     |         |         |

|   |       |       |
|---|-------|-------|
| 3) Deferred premiums  | 2,000 |       |
| Premium income  |       | 2,000 |
| (to record premium income = $\$ 120,000/5 = \$ 24,000/12 = \$2,000$ ) |       |       |
| Provision expense   | 1,000 |       |
| Allowance for claims  |       | 1,000 |
| (to record provision expense = $\$ 2,000*.50$ )                       |       |       |

B) Deferred Premium at December 31, 1997

|                     |            |
|---------------------|------------|
| Opening Balance     | \$ 120,000 |
| Less premium earned | (24,000)   |
| Ending Balance      | \$96,000   |

C) Contingent Liability = \$ 1,800,000  
( $\$2,000,000* .90$ )

E) The Contingent Liability expires on December 31, 2002 which is the claim expiry date

## Case Studies

### Expenses

#### Example 3

Refer to example 2.

What additional accounting entries would be required if a broker was involved in providing the business and a non-recoverable fee of \$10,000 was charged by the broker?

#### Answer to Example 3

|  |        |        |
|--|--------|--------|
| Broker fee expense                                   | 10,000 |        |
| Broker fee payable                                   |        | 10,000 |
| (to record set up of broker fee payable and expense) |        |        |
| Broker fee payable                                   | 10,00  |        |
| Bank   |        | 10,000 |
| (to record payment of broker fee)                    |        |        |

#### Example 4

If the broker in example 3 provided ongoing services throughout the policy, describe how the accounting treatment would differ from example 3.

#### **Answer**

The broker fee would be expensed over the life of the policy.

## Case Studies

### Foreign Exchange

#### Example 5

On October 3, 1997, premium in the amount of U.S. \$ 100,000 is received for an insurance policy. The Financial Statements of the insurer are translated to Canadian dollars.

The daily close exchange rates are as follows:

|                   |                    |
|-------------------|--------------------|
| October 3, 1997   | US\$ = \$1.40 Cdn. |
| October 31, 1997  | US\$ = \$1.50 Cdn  |
| November 30, 1997 | US\$ = 1.35 Cdn    |

- 1) What is the exchange rate gain or loss on the Income Statement for the period ended October 31, 1997?
- 2) What is the exchange rate gain or loss on the Income Statement for the period ended November 30, 1997?

**Answer to Example 5**

| <b><u>1) Assets</u></b>       | <b><u>US\$</u></b> | <b><u>Exchange Rate</u></b> | <b><u>Cdn Equivalent \$</u></b> |
|-------------------------------|--------------------|-----------------------------|---------------------------------|
| Oct 3, 1997                   | \$100,000          | 1.4                         | \$140,000                       |
| Oct 31 1997                   | \$100,000          | 1.5                         | \$150,000                       |
| <b>Foreign Exchange Grain</b> |                    |                             | <b><u>\$10,000</u></b>          |

**Note:** *In this case the US\$ has appreciated in value relative to the Cdn \$, therefore since this is an asset account there is a foreign exchange gain on translation.*

| <b><u>2) Assets</u></b>      | <b><u>US\$</u></b> | <b><u>Exchange Rate</u></b> | <b><u>Cdn Equivalent \$</u></b> |
|------------------------------|--------------------|-----------------------------|---------------------------------|
| Oct 31, 1997                 | \$100,000          | 1.5                         | \$150,000                       |
| Nov 30, 1997                 | \$100,000          | 1.35                        | \$135,000                       |
| <b>Foreign Exchange Loss</b> |                    |                             | <b><u>(\$ 15,000)</u></b>       |

**Note:** *In this case the US\$ has depreciated in value relative to the Cdn\$, therefore since this is an asset account there is a foreign exchange loss on translation.*
