Voluntary goals of women's representation in leadership in public and private sectors toward by the end of 2020 (%; total target of increasing the share of women in leadership positions which are based on each economy's indicators and definitions, or equivalent to P-5 and above of the UN)	 Aspire to achieving 30% gender representation over five years (2014-2019), with the longer term goal of achieving gender balance on boards
Include a brief plan of action of how your economy plans to achieve your voluntary goals.	 Federal Ministers and the Advisory Council would work with prominent individual Chairs, FP 500 companies, Canadian business associations, large shareholder groups and advocacy organizations to promote increased representation of women on boards. The Government of Canada plans to build on the positive efforts it has achieved and plans to launch a Canada-wide initiative to encourage the private sector to attain gender-balanced boards.

 The voluntary goals will be reviewed by each economy in the process of developing Interim report.
