**Women in 2023: Access and Opportunities**

The APEC Women and the Economy Dashboard measures areas that affect women’s economic opportunities. The latest report reveals progress amid lingering barriers.

### CAPITAL AND ASSETS

**Improved access to formal financial institutions amid the pandemic**, empowering women to participate in economic activities such as entrepreneurship.

**Reduced gap between women and men in access to finance and credit**, reflecting a more inclusive financial system in the APEC region.

However, **only 9 out of 21** APEC economies have laws against credit discrimination based on sex.

**GAP BETWEEN WOMEN AND MEN (%)**

**JOBS AND MARKETS**

Women's labor force participation declined during COVID-19, amid closures of:
- frontline services, employing mostly women
- care facilities, increasing women's burden of unpaid work.

While labor markets in APEC have progressively removed restrictions to encourage more women to participate...

**only 14 out of the 21** APEC economies allow women to work in industrial jobs in the same way as men do.

**only 16 APEC economies** allow women to work in jobs deemed dangerous in the same way as men.

During the pandemic, firms faced international market access difficulties. Post-pandemic recovery is complicated by rising trade-restrictive measures, impacting MSMEs, many of which are women-owned/led.

**ACCESS OF DOMESTIC COMPANIES TO INTERNATIONAL MARKETS**
(scale of 1-100, higher is better)

HEALTH AND PROTECTION FROM VIOLENCE

Considerable improvements in women’s health.

Maternal mortality ratio declined

| 70 maternal deaths per 100,000 live births in 2008 | 28 maternal deaths in 2021 |

Births attended by skilled attendants rose

| 92% of live births in 2008 | 98% of live births in 2019 |

Safeguarding women from domestic violence and sexual harassment impact their well-being and productivity.

- **20 APEC economies** have laws that provide protection to women who are victims of domestic abuse.
- **19 economies** have specialized courts or procedures to process cases of domestic violence.
- **17 economies** have laws against sexual harassment in the workplace.

WAGES AND LEADERSHIP

- Wage inequality persists.
- Women’s remuneration is only **70%** of men’s.

**Only 11 out of 21** APEC economies have laws on equal remuneration for women and men for work of equal value.

**Only 27%** of political leadership positions are held by women in 2022, the highest level achieved in 20 years.

APEC still has a long way to go to achieve gender equality in leadership roles.

More women owners than managers in APEC, reflecting in part women’s shift to entrepreneurship at the height of the pandemic.

Based on the 2023 APEC Women and the Economy Dashboard by the APEC Policy Support Unit
Women in 2023: Access and Opportunities

Navigating rapid technological changes requires STEM-related skills. However, women's representation in STEM, R&D, and research and innovation has averaged **below 35%** in many APEC economies.

**DIGITAL INCLUSION**

More women in the region are using digital payments or buying something online.

Navigating rapid technological changes requires STEM-related skills. However, women's representation in STEM, R&D, and research and innovation has averaged **below 35%** in many APEC economies.

**POLICY AND DATA GAPS**

- **Improving women's representation in leadership roles** to advance gender equality in access and opportunities.
- **Addressing policy gaps in access to credit and employment** widens opportunities for women to participate in the economy.
- **Generating sex-disaggregated data** is key to better-informed and well-targeted policy interventions that promote women's empowerment.

**SEX-BASED BIASES**

- **Changing perceptions** of women's business and leadership skills as inferior to men's.
- **Eliminating gender stereotypes**, such as girls being less interested in STEM subjects, women only pursuing traditional careers, and women being confined to homemaking roles.
