## NOTES

**Cross-cutting issues:** All projects should maximise: regional economic integration; developing human capital; building linkage between APEC economies; gender equality; engagement of other APEC fora, ABAC, the private sector and other multilateral organisations; multi-year capacity building opportunities; and the spectrum of capacity building models and activities, although the extent to which projects incorporate these methodologies will not affect their priority rankings.

**Prioritisation within a rank:** In the event that there are more project proposals than available funding for initiatives within a particular rank, projects will be prioritized in accordance to the degree to which they contribute to its rank's objective (and therefore to the APEC's overall objective of the furtherance of the goal of economic integration via free and open trade and investment).
