High Value Agricultural Products - A Case Sharing in Chinese Taipei

Hung-Hao Chang

Professor

Dept. Agricultural Economics, National Taiwan University Chinese Taipei

- 1. Geographical characteristics leads to inequality in economic development.
- 2. Farm production concentrates on western coast.
- 3. Agricultural production and sale zones

Challenges of Agricultural Development

>Old farm age structure

-- compared to developing economies, farmers are much older.

>Shrinking farm size

-- the farm size decreased over time.

>To development ecosystem of farm production

-- concise among farm production, environmental friendly practice, consumer demand for food safety products.

>Increase value-added farm products
